

PARENT AND 8th GRADER INFORMATION NIGHT

Please join us at Camden County Technical Schools to learn how your 8th grader can have it all – a high school education, employable skills, and the opportunity to earn college credits while still in high school. Graduates of CCTS have many options including obtaining employment in a career that is in demand, to attending two- and four- year colleges.

Students at CCTS attend school for a full day and receive their academics as well as career training plus the opportunity to participate in clubs, sports and a variety of after school activities. CCTS offers 33 career areas in allied health, business, leadership, technology, hospitality, and the building trades.

To learn more about our high school as a tuition-free option for your 8th grader, please attend one of our Information Sessions.
